## **About Reacfin**

Developing, in partnership with our clients, sustainable actuarial & quantitative financial solutions, from design and modelling to operationalization in their systems, building on strong data analytics, while securing full transparency and integral knowledge transfer.

Reacfin is the reliable bridge between academic excellence and market best practices.

The company started its activities in 2004 as a spin-off of department of UCLouvain School of Statistics, Biostatistics and Actuarial Science.

In its early days, we focused on actuarial consultancy services for Belgian Pension Funds, Insurance Companies and Mutual organizations. Rapidly, in the following years, we expanded our business internationally and broadened our scope of services to Risk Management, Quantitative Finance, Portfolio Management and Data Analytics for Financial Institutions in the broader sense (i.e. Insurers, Banks, Asset Managers, Pension Funds, Financial Market Infrastructures and Regulators).

Based in Louvain-la-Neuve (Belgium), Reacfin employs today more than 25 consultants most of which hold PhD's or highly specialized university degrees.

Over the years, we have now served in excess of 150 different financial institutions, the vast majority of which are recurrent clients, which we see as the most convincing indicator of our clients satisfaction.

Missions we regularly perform consist of models design, developments & deployment, model validations, definition of risk- & portfolio management policies, organization & governance advisory, strategic asset allocations or specialized management consulting with regard to Risk & Portfolio management problems.

We articulate our offer along 3 brands:

We offer consulting services in actuarial science & quantitative finance, including a.o. capital portfolio - product - risk - and liquidity - management. We build our expertise on broad data analytics capacities.

We develop solutions in partnership with our clients, i.e. we integrate our solutions in our client's systems and processes and we secure full knowledge transfer (e.g. open source code).

We share our knowledge with our clients. We offer a comprehensive learning platform, including onsite trainings, e-learning modules, webinars etc.
