25/08/2026 EBA consults on three draft RTS on the reclassification of investment firms as credit institutions, when they exceed the EUR 30 billion total assets threshold. The proposals clarify how total assets should be calculated against this threshold, how investment firms should report this information to competent authorities, and the conditions under which competent authorities can decide to grant a waiver. The revised RTS reflect the 2024 amendments to the CRD and contribute to a more proportionate and risk-based application of the framework for investment firms. The consultation runs until 25 November 2026.

26/08/2026 EBA consults on draft RTS specifying the operational risk management framework that institutions must have in place as per Article 323 of the CRR3. The draft RTS set out harmonised, proportionate requirements for the governance, management process and systems institutions should use to identify, assess, monitor and manage operational risk. The consultation runs until 31 December 2026.

03/08/2026 The ESAs propose amendments to simplify the bilateral margin requirements of the EC's Delegated Regulation (EU) 2016/2251.

See [the related EBA press release](#).

05/08/2026 EBA consults on a new reporting framework to support the validation and ongoing monitoring of initial margin models based on the SIMM developed by the ISDA. The proposed reporting requirements will provide the EBA with information necessary to effectively perform its role as central validator of pro forma models under EMIR, while ensuring a proportionate approach for reporting entities. The consultation runs until 2 November 2026.

See [the related EBA press release](#).

18/08/2026 ESMA consults on a proposed annual reporting framework under EMIR for clearing activity at recognised third-country CCPs, aimed at improving supervisory visibility of EU firms' exposures to such CCPs. The consultation runs until 12 October 2026.

See [the related ESMA press release](#).

03/08/2026 EBA publishes a no-action letter on the boundary between the banking book and the trading book and shared technical clarifications on issues linked to the EC's Delegated Act modifying the calculation of own funds requirements for market risk based on the FRTB framework.

About Reacfin

We develop **sustainable actuarial, quantitative financial and AI for Finance solutions** in partnership with our clients (from **design and modeling** to **operationalization** in their systems), building on **strong data analytics** while securing **full transparency** and **integral knowledge transfer**.

Reacfin

Reacfin is the reliable bridge between academic excellence and market best practices.

The company started its activities in 2004 as a spin-off of department of UCLouvain School of Statistics, Biostatistics and Actuarial Science.

In its early days, we focused on actuarial consultancy services for Belgian Pension Funds, Insurance Companies and Mutual organizations. Rapidly, in the following years, we expanded our business internationally and broadened our scope of services to Risk Management, Quantitative Finance, Portfolio Management and Data Analytics for Financial Institutions in the broader sense (i.e. Insurers, Banks, Asset Managers, Pension Funds, Financial Market Infrastructures and Regulators). Today, Reacfin is extending its range of services to include process automation, the introduction of AI and, more generally, the optimal use of corporate and external data.

Based in Louvain-la-Neuve (Belgium), Reacfin employs today more than 35+ consultants most of which hold PhD's or highly specialized university degrees.

Over the years, we have now served in excess of 150 different financial institutions, the vast majority of which are recurrent clients, which we see as the most convincing indicator of our clients' satisfaction.

Missions we regularly perform consist of models design, developments & deployment, model validations, definition of risk- & portfolio management policies, organization & governance advisory, strategic asset allocations or specialized management consulting with regard to Risk & Portfolio management problems.

We articulate our offer along 3 brands:

We offer consulting services in actuarial science & quantitative finance, including a.o. capital, portfolio, product, risk and liquidity management. We build our expertise on broad data analytics capacities.

By blending strong actuarial and financial business expertise with an in-depth understanding of cutting-edge IT and AI technologies, we enable our clients to become more competitive and focus on their core business such as complex analysis, strategic decision-making and innovation.

We share our knowledge with our clients. We offer a comprehensive learning platform, including on-site trainings, e-learning modules, e-classrooms and webinars.
